

We Gather We Grow

5th China Re-PET Industry Forum

Organizer: Zhejiang Huarui Information Consulting Co., Ltd.
(CCF, CCFGroup)

Oct 18-19, 2017
Hangzhou China

邀請函
Invitation

Preface

China domestic environmental regulation keeps tightening in 2017. Some plastics cleaning plants have been forced to shut down. The 34th Conference of the Central Leading Group for Comprehensively Deepening Reform marks a turn of China re-PET import policy. Meanwhile, Fed's interest rate hike, Central Banks' monetary tightening policy as well as OPEC's oil production cut-down agreement and virgin PET price all make re-PET industry more complicated. How shall re-PET industry survive these challenges? It is a question of urgent concern of all industrial participators.

- ★ Will PET flake import totally become a thing of past?
- ★ How shall the industry bridge future feedstock shortage?
- ★ In what way shall recycled polyester fiber products be upgraded on rising cost?
- ★ What is the prospect of high-end recycled products application market?
- ★ Has the industry reached the turning point of transferring businesses to overseas?
- ★ What countries are suitable for industrial investment?
- ★ How to respond to related investment risks?

Standing at this monumental point, CCFGroup will hold the **5th China Re-PET Industry Forum (2017) on Oct 18-19, 2017 in Xiaoshan, Hangzhou** to discuss the development opportunity and direction of re-PET industry at its turning point.

Review

2016

Topic

A.M. Oct 19

Macro
Economy

2017 macro economy analysis and interpretation

Global PX-PTA supply demand pattern analysis and forecast

P.M. Oct 19 (Recycled polyester session)

About CCFGroup

Zhejiang Huarui Information Consulting Co., Ltd was founded in 1997, as the leading consulting company in chemical fiber and textile industry. "Timely and accurate information" is always upheld as our principle.

As the first website providing chemical fiber market information in China, China Chemical Fiber Website (CCF) is famous for quick response and unique perspective and has achieved the reputation of "No. 1 chemical fiber website in China."

In collaboration with China Cotton Textile Association and China Yarn Dyed Weaving Association, China Cotton Textile Website (TTEB) which integrates the advantages in industry information resources is dedicated to provide authorized industry guidance and accurate market information.

CCFGroup.com integrating selected information from CCF and TTEB has provided industry information and consulting service to overseas customers such as BP, SABIC, Fiber Economics Bureau, Cotton Inc. etc.

With comprehensive data of China chemical fiber and textile industry and professional analyzers, we have been a regular information supplier for Ministry of Commerce as well as National Development and Reform Commission.
